

Allschwil, Switzerland, February 03rd, 2016

**Meet the Bilcare Research Global Pharma Team at Pharmapack Europe
Booth 841 | Porte de Versailles | Paris | France**

The Global Pharma Team will be exhibiting for the 4th year in a row at the Pharmapack in Paris. Bilcare will share the latest developments in its offer to the pharmaceutical packaging market. Besides packaging materials itself, Bilcare offers its expertise in packaging design and drug delivery systems fitting to patients' needs.

With the Bilcare team of experts on hand visitors will get in depth information about BilcareOptima™. This ground breaking, independent study examines the degradation of a to be packed product under various influences like humidity, temperature, light exposure and enables customers to find the perfect fit packaging material for their products. BilcareOptima™ avoids extensive trials and therefore significantly reduces time to market.

Bilcare Research Pharma Team will shortly be introducing new brand names for its existing products and is going to inform customers in due course. During the show, the ease and logic of the new nomenclature will be demonstrated.

"Pharmapack, often considered the leading event in the pharma packaging & drug delivery industry, is one of the most important platforms for Bilcare as a packaging solution provider to the pharmaceutical industry," said Andreas Pfefferle, BU Head Global PPI. "We are looking forward to providing solutions as well as further innovate our product portfolio by getting new and exciting tasks during the show".
