Liveo Research collaborates with Plásticos DISE SA for the Argentinian Market

Liveo Research and DISE are pleased to announce they have entered into a strategic partnership to provide Argentinian pharmaceutical manufacturers and contract packagers with Liveo's comprehensive blister film portfolio. DISE's local Pharma Business Unit in Córdoba facilitates access to Liveo's renowned blister films while maintaining Liveo's globally recognized standards. Argentinian customers will significantly shorten the supply cycle and greatly facilitate the importation process through the Liveo and DISE partnership.

"We are very excited to be working with DISE," said Andreas Pfefferle, Global Pharma BU Head Liveo Research. "This partnership reflects our desire to work with companies that share our focus of local market needs. We are pleased to bring Liveo's customer-oriented services and products to the Argentinian market through our collaboration with DISE. Together, working as one team, we will supply Liveo's quality blister materials quickly and efficiently."

"It is an exciting moment for DISE. The addition of Liveo's superior quality blister films, as well as its world-class service offerings combined with DISE's local platform will create robust synergies. The Liveo/DISE partnership allows us to expand our customer segments base with reliable offerings to the existing limited local options for Pharma rigid films," said Carlos Seidel, Managing Director of DISE Argentina. "We are eager to start our collaboration work."
