LIVEO
RESEARCH

Technical Process Engineer (m/f/d)

Essentially, your responsibilities will include:

- Develop, configure and optimize industrial processes from inception through to start up and certification
- Develop best practices, routines and innovative solutions to improve production rates and quality of output
- Lead or support technology transfers / improvements by conducting laboratory and/or pilot plant experiments and providing technical risk assessments for process adjustments
- Assess and oversee situation in the area of BOM / recipes-Potentials, test changes with all related areas and successfully implement them throughout the group
- Contribute to technical analysis and problem solving in fast paced / task force environment
- Enhance and support data driven problem / root cause analysis and improvement (Ideally SixSigma Black-Belt)

You are the best fit for us if you have the following qualifications:

- Completed studies in the field of chemistry, mechanical/electrical engineering or industrial engineering or comparable
- Familiar with the structure and content of (films) production system, especially with the related processes, and the knowledge how to use it
- At least 5-7 years of professional experience in the field of Technical process engineering or comparable
- High-level skills in project management and lean management/process optimization
- Leadership qualities mandatory, which will include acting as mentor to their teams
- Talented communicator, conversing with the team and with upper management
- Very good English and German Language Skills, verbally and written
- Experience with applied statistics, stochastics and rationalization
- Very good IT skills; Routine handling of MS Office software, esp. Excel
- Knowledge of the film, packaging or pharmaceutical industries advantageous
- Ability to analyze situations quickly, coordinate with the team and find solutions
- Critical-thinking skills, solution-oriented, systematic and structured way of working, high level of comprehension
- Communication and cooperation skills, high ability to work under pressure

What you can look forward to with us:

- Attractive salary based on collective wage agreement (chemical industry)
- Additional vacation pay and annual bonus
- Employer-funded company pension plan
- Home office arrangement
- Company fitness offers
- Company canteen

ABOUT LIVEO RESEARCH

Liveo Research is a leading global manufacturer of films and foils for the pharmaceutical and consumer goods industries. Headquartered in Basel, Switzerland, the company has subsidiaries in Bötzingen and Staufen (Germany), in Delaware / USA and in Singapore and China. Liveo Research was founded in 1962 as Myraplast Staufen GmbH. In addition to a broad portfolio of blister films, the Bötzingen site offers its customers value-added services based on the Quality by Design principle. The Staufen site produces PET-G films for sleeve labels and rigid PVC films for printing and office supplies. Around 1,000 employees worldwide take care of the needs of Liveo Research customers.
