

LIVEO RESEARCH ADDS LOCATION IN ASIA

Basel, July 4th, 2022 - Liveo Research AG has added another location to its global footprint. A new conversion and storage center in Taicang – part of Suzhou, China – is ready to be part of Liveo’s growth strategy to serve customers in China and other parts of Asia.

This will bring increased benefits such as shorter delivery times, orders and payments in local currency, and faster response times overall.

This will help Liveo Research to achieve its goal of consistently improving its ability to service new and existing customers and helping to grow our position in this important market.

Liveo is diversifying its supply locations to mitigate future supply chain risks, thereby strengthening our commitment to our customers.
