

MEDICAL PACKAGING INNOVATIONS

**Rigid PET Films
Highest Quality
Fast Delivery**

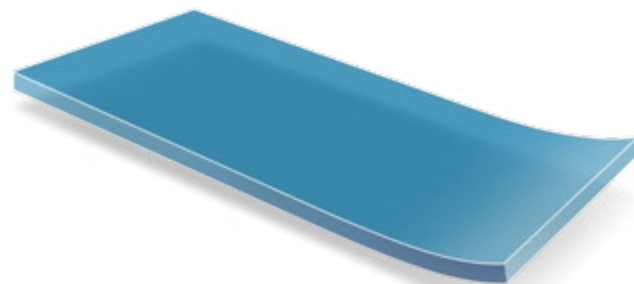

MEDICAL PACKAGING INNOVATIONS

STANDARD PORTFOLIO

MediForm MG

Extruded PETG films

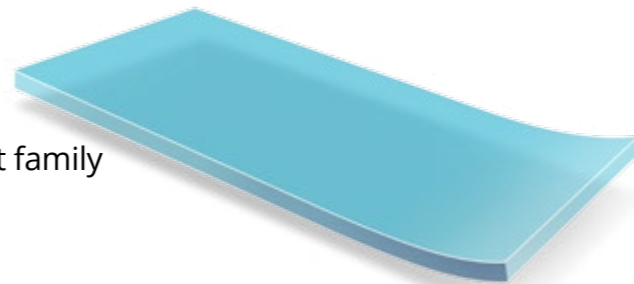

- for primary and secondary packaging
- suitable for all common sterilization methods
- available in different resin qualities

MediForm MA

Extruded APET films

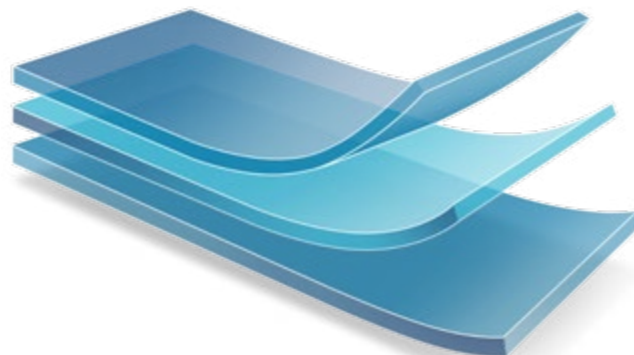

- most economic variety of the MediForm product family
- for standard thermoforming applications
- sterilization with EtO and gamma rays
- recyclable in RIC1 stream

MediForm GAG

Extruded PET GAG films

- outer layers (PETG) available in different resin qualities, inner layer made of APET
- surface properties similar to PETG
- sterilization with EtO and gamma rays

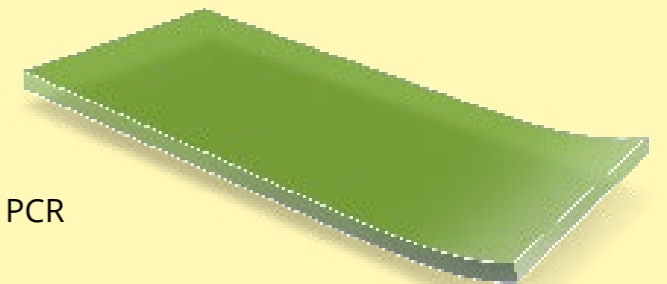

Highest Quality. Fast Delivery.

LATEST AND UPCOMING DEVELOPMENTS (Status: Q3/2023)

MediForm MR

Extruded APET films with PCR

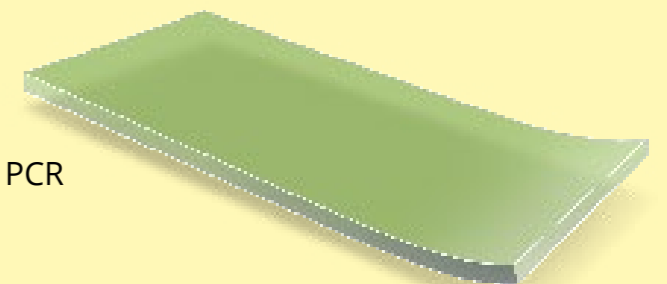

- latest development
- outer layers in virgin material, inner layer with PCR
- Carbon footprint minimized
- recyclable in RIC1 stream

MediForm MC

Extruded PETG films with PCR

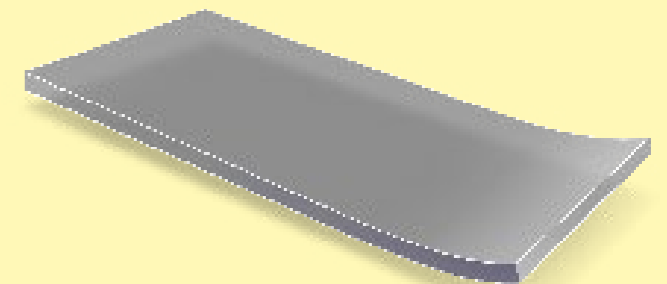

- PCR content chemically recycled
- outer layers in virgin material, inner layer with PCR
- Carbon footprint minimized

MediForm MP

Extruded PP films

- density <math><1 \text{ g/cm}^3</math>
- improved barrier properties vs. PET & PS
- available with or without COC content

Superior Quality

- state of the art extrusion lines
- 100% visual surface inspection
- perfect thickness distribution
- manufactured in accordance with Food Safety Certification FSSC 22000

Applications

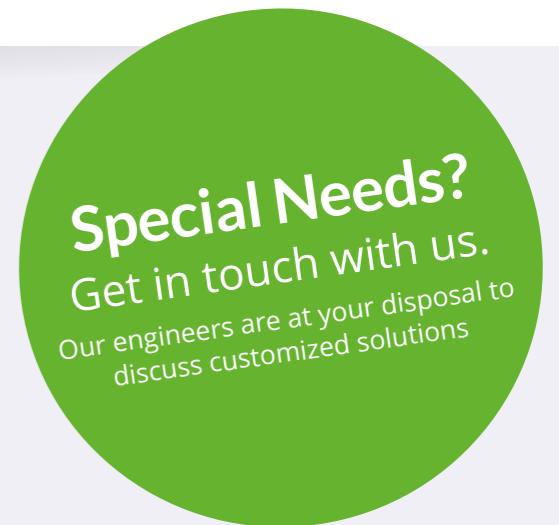

Trays / Blisters / Clamshells

Colours

As standard in transparent clear or medical blue; other colours are available on request

Certificates

- ISO 9001
- ISO 14001
- FSSC 22000
- EMAS
- Certificate of Sustainability
