

Press Release

Liveo Research strengthens its “Medical Packaging Innovations” offering

Basel, 24th October, 2023 – Liveo Research is strengthening its focus on its "Medical Packaging Innovations" (MP \square) business. In future, this division will operate in the market alongside the two established business units "Pharma Packaging Innovations" (PP \square) and "Specialty Films Solutions" (SFS). It rounds off the company's portfolio of offerings in the growing market for primary and secondary packaging for medical devices and aids.

This business area has been strengthened not only in terms of staff, but also through a significant investment in a new multilayer extruder. Currently, thermoforming sheets are produced by MP \square for the global market. Customers can choose from different polymer types, a varied section of raw materials and different colors. The films are manufactured using a multi-layer coextrusion process, which allows a high degree of flexibility for special requirements.

In addition to the established materials and films in the thermoforming sheet sector, MP \square will focus on expanding its development of promising film types for the future, including various sustainable sheet variants with different recycling contents and other options. MP \square already offers some of these in its product portfolio and offerings will expand in the future.

The company itself is not only a classic film supplier, but a system solution provider with a broad product portfolio that understands how to respond to customers' special wishes and needs. Liveo Research also realizes innovative new developments in partnership with its customers.

Dr. Carsten Heldmann, CEO of Liveo Research, says: “The current upgrade enhances the continual development of our medical packaging business and supports our position as the supplier of choice for customers in the pharmaceutical and medical space.” He states: “In the

future, we will respond even better to complex, difficult and individual requirements with our strengthened team. We are very well positioned for this!"

Liveo Research - An Overview

Founded in 1962, Liveo Research is a top global producer of materials for primary packaging in the pharmaceutical and medical industry, as well as special applications such as shrink labels. Headquartered in Basel, Switzerland, it has production sites in Boetzingen and Staufen (Germany), Delaware (USA), Singapore, and Taicang (China). Liveo Research currently has approximately 1,000 employees worldwide. In addition to a broad product portfolio of packaging materials, the company also offers its customers value-added services like "LiveoOptima" that support them to find the best, sustainable packaging solutions.
