

## Press release

### **Compamed / Medica trade fair in Duesseldorf, Germany: Liveo Research AG launches One-Material Tray (OMT – The Circular Tray™)**

**Basel, November 17, 2025** - At the Compamed / Medica trade fair in Duesseldorf, Germany, Swiss packaging specialist Liveo Research AG is presenting an innovative new development for packaging medical devices: the "One-Material Tray" concept, or "OMT – The Circular Tray™" for short.

It consists of a thermoformable PET film that can be used both for the packaging body ("tray") as well as for the sealing film. The sealing film itself is fully printable and features easy opening utilizing a 'peeling mechanism'.

An additional unique feature of this one-material packaging concept is its improved environmental performance. The packaging is easier to recycle, and the concept can also include post-consumer recycled (PCR) PET. This makes OMT – The Circular Tray™ a truly circular solution with the potential for a significantly lower carbon and overall environmental footprint compared to conventional multi-material trays.

Magnus Elsaesser, Vice President Global MPI & PPI EU at Liveo Research AG, explains: "Medical packaging often uses a mix of different materials, such as PET-PE coated and lacquered papers. This innovative One-Material Tray concept avoids the problem of separating these materials and thus already creates the basis for widespread recycling and further processing."

## **Liveo Research - An Overview**

Founded in 1962, Liveo Research is a top global producer of materials for primary packaging in the pharmaceutical and medical industry, as well as special applications such as shrink sleeve labels. Headquartered in Basel, Switzerland, it has production sites in Boetzingen and Staufen (Germany), Delaware (USA), Singapore, and Taicang (China). Liveo Research currently has 750 employees worldwide. In addition to a broad product portfolio of packaging materials, the company also offers its customers value-added services like “LiveoOptima” that support them to find the best, sustainable packaging solutions.
