Liveo Research AG publishes new Sustainability Report

Basel, December 19, 2025 - Liveo Research AG has published its second Sustainability Report. The English-language, digital report addresses the global sustainability management of the Swiss pharmaceutical packaging specialist, referencing the Global Reporting Initiative (GRI). The focus is on the reporting year 2024.

The report details Liveo Research's sustainability strategy with its three pillars: "Planet, People, and Products" (or "3Ps"). It also includes a comprehensive chapter on governance.

Sustainability highlights include the definition of a new product and service offering in the area of pharmaceutical packaging, a recycling certification for the innovative One-Material Blister (OMB) made from PET, and the implementation of this One-Material Blister at a global pharmaceutical company. These examples of close collaboration with customers and partners demonstrate Liveo Research's consistent pursuit of the goal of reducing waste and its carbon footprint along the entire value chain.

Liveo Research AG has been actively pursuing its sustainability activities for many years and continuously monitors progress using established frameworks such as the Science-Based Targets initiative (SBTi), EMAS (Eco-Management and Audit Scheme), ISO 9001, ISO 45001, and EcoVadis.

"Sustainability is a key component of Liveo Research's corporate strategy: We consistently consider sustainability in all our projects and are committed to implementing it. Therefore, we are pleased to report on the progress of our sustainability activities, both now and in the future," explains Dr. Carsten Heldmann, CEO of Liveo Research AG.

You can order a digital version of the Sustainability Report free of charge at this email address: info@liveoresearch.com

Liveo Research - An Overview

Founded in 1962, Liveo Research is a top global producer of materials for primary packaging in the pharmaceutical and medical industry, as well as special applications such as shrink sleeve labels. Headquartered in Basel, Switzerland, it has production sites in Boetzingen and Staufen (Germany), Delaware (USA), Singapore, and Taicang (China). Liveo Research currently has 750 employees worldwide. In addition to a broad product portfolio of packaging materials, the company also offers its customers value-added services like LiveoOptimaΩ that support them to find the best, sustainable packaging solutions.
