Platinum medal from EcoVadis for Liveo Research AG's sustainability management

Basel, January 26, 2026 - EcoVadis, the world's largest provider of sustainability assessments, has once again given Liveo Research AG's sustainability management an excellent rating.

The Liveo Research site in Singapore has improved significantly since the last assessment and now boasts an impressive 92 out of a possible 100 points. This means it has once again been awarded the prestigious platinum medal and is among the top 1 percent of the more than 150,000 companies assessed by EcoVadis worldwide.

Liveo Research pursues a detailed sustainability strategy based on three pillars: "Planet, People and Products (3 Ps)". This strategy is implemented at all of the company's locations, with specific goals, strategies, and measures defined for each pillar. Its implementation is constantly monitored, with progress in the area of decarbonization, for example, being tracked by the Science Based Targets initiative (SBTi). The company documents this progress annually in a Sustainability Report.

EcoVadis' current assessment of the Singapore site covered four comprehensive areas: environment, labor and human rights, ethics, and sustainable procurement. This broad approach reflects Liveo Research AG's equally broad sustainability strategy and shows the individual progress made in detail.

"We are delighted to receive this award, as EcoVadis' neutral analysis confirms the success of our ambitious sustainability activities," explains Dr. Carsten Heldmann, CEO of Liveo Research. He adds: "Not only in Singapore, but also at our other global locations, we have been able to significantly improve our EcoVadis ratings: today, all of our locations are among the top 1 percent of companies in the plastics industry."

EcoVadis – An Overview

EcoVadis is the world's largest platform for sustainability ratings and honors the commitment and performance of companies in the area of sustainability with its medals. The company thus sets the global economic standard for corporate sustainability ratings. More than 150,000 companies in over 250 sectors and 185 countries worldwide have already received a rating. EcoVadis rates companies in four main categories: Environment, Labor and Human Rights, Ethics and Sustainable Procurement. The assessment provides an in-depth analysis of performance and an action plan for continuous improvement.
